SUMMARY

Full-Stack Software Engineer with experience building scalable web applications using the TypeScript ecosystem. Proficient in developing responsive front-end interfaces and robust back-end services with modern frameworks and cloud technologies. Passionate about writing clean, maintainable code, solving complex problems, and delivering user-focused products. Quick to learn new technologies and thrive in collaborative, fast-paced development environments.

SKILLS

- **Languages:** TypeScript, JavaScript, HTML5, CSS3
- **Databases & ORM:** PostgreSQL, MongoDB, Prisma, Supabase
- **Cloud & DevOps:** AWS (Amplify, S3, Lambda), CI/CD Pipelines, Git, GitHub
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Frontend:** Tailwind CSS, React, Next.js, Framer Motion

PROFESSIONAL EXPERIENCE

1. Annulla | Full-Stack Developer

- Spearheaded backend architecture for a scalable subscription management SaaS MVP using Next.js and React, driving the platform toward a targeted product launch.
- Designed PostgreSQL schemas (via Supabase) for subscription lifecycles and engineered secure API workflows by integrating Supabase Auth with Resend for access control.

2. AI Multi-Agent Trading Platform | Full-Stack Developer

- Architected a scalable Node.js/TypeScript backend orchestrating autonomous bots, featuring cross-verification protocols to mitigate LLM hallucinations and ensure data fidelity.
- Integrated REST APIs (CoinMarketCap, News API) to stream live market data, executing automated logic and logging secure transaction audit trails into a database.

GitHub: <https://github.com/OjoAjogwuOkolo/quant-engine>

PROJECTS

1. Gamified Bible & Prayer Tracker

- Built a full-stack application for Bible study planning, prayer tracking, and reading progress.
- Implemented authentication, streak tracking, achievements, and personalized dashboards.
- Developed REST APIs and optimized data models for user activity tracking.
- Designed a responsive mobile-first user interface.

GitHub: <https://github.com/OjoAjogwuOkolo/Bible-study-tracker>

2. TaskFlow

- Built a full-stack task management platform with secure authentication and role-based access control.
- Developed task, workspace, analytics, and team messaging modules backed by REST APIs.
- Designed responsive dashboards with interactive productivity analytics.
- Architected reusable React components for a scalable frontend.

GitHub: <https://github.com/OjoAjogwuOkolo/taskflow>

3. Personal Portfolio Website

- Developed a responsive portfolio using reusable React components and modern UI architecture.
- Implemented animated interfaces, responsive navigation, and interactive project showcases.
- Applied accessibility best practices and mobile-first responsive design.
